RE: Letter of Recommendation

To Whom It May Concern,

I have personally worked with Interface Construction over the past 5 years on multiple projects at St. Mary's Health Center during the project planning/preconstruction phases. The projects have ranged from complex Nursing Unit renovations to multi-phased Radiology/Emergency Department renovations. In most cases, these projects required Interface Construction's staff to coordinate & execute multiple pre-moves within each department to facilitate the actual renovation. It also required Interface Construction to perform their work in occupied spaces with high patient volumes, requiring the execution of strict Infection Control Policies.

Interface Construction has performed their services for SSM Health Care with distinction and has consistently proven their ability to exceed all expectations placed on them by the Owner. I would, without hesitation, recommend Interface Construction for any project requiring multiple phasing, tight scheduling, strict adherence to safety and environmental concerns and minimal impact to ongoing operations.

Sincerely yours,
